UPGRADED BRAKE COMPONENTS NOW AVAILABLE FOR YOUR SPEC RACER FORD

Is your SRF suffering from excessive brake drag? Are your caliper slide rails worn or grooved? With many SRF's being over 30 years old your answer is probably yes. That means it is probably time for you to upgrade your brake caliper assemblies. These units were designed specifically for the Spec Racer Ford by SCCA Enterprises and Wilwood Engineering. You will immediately notice reduced brake drag and more uniform pad wear. The kit includes: New Calipers, Caliper Adapter Brackets, Brake Line Hardware, and Seals. Brake pads or rotors not included. Contact Spec Racer Sports to order your Spec Racer Ford brake system upgrade!

SHOCK REDUCING CLUTCH DISK NOW AVAILABE FOR YOUR SRF

The additional stress placed on the Spec Racer Ford drivetrain with the introduction of the Gen3 powerplant has proven to be very challenging on the Mazda gearboxes. SCCA Enterprises has worked diligently through many design iterations to try and mitigate this additional stress and strain. A new clutch with a sprung and dampened center section and less aggressive friction material has proven through development testing to show significant promise. After extensive testing, production units are now available for your Spec Racer Ford. Call Spec Racer Sports to order yours!
